Transferring Programs from your PC to your TI83/84

(last updated 1/09)

These instructions are based on TI Connect version 1.6 for the PC

1. Download and install the TI Connect software from Texas Instruments. The TI website is constantly changing so you may have to do some looking for the software. As of 1/09 we found it at:

http://education.ti.com/educationportal/sites/US/nonProductMulti/download_stepbystep.html ?bid=2

- 2. Connect your calculator to your computer via a USB cable (TI-84) or USB Graphlink Cable(TI-83 or 84). If you do not have USB or Graphlink cable to connect your calculator to your computer then you cannot transfer programs to your calculator. Contact your instructor for further assistance. You may have to bring or send your calculator to your instructor if they agree to do so.
- 3. Navigate to the folder on your PC where you saved the downloaded TI-83/84 programs.
- 4. Select the program(s) you want to transfer and right click on it.
- 5. Select Send To TI Device.

6. The send to device window will open and the program(s) you selected will appear.

Sending to TI-84 Plus Select Device Destination Folder File Name Path Set to RAM RAM FLSD C:\Documents and Settings\bjea\FLSD.8xp Set to Archive Remove Remove Move Up Move Up	🐐 Send To TI Devi	ce

7. Click on **Send to Device**. The program(s) will then transfer to your calculator.

Capturing Screen Shots From Your Calculator

(last updated 1/09)

These instructions are based on TI Connect version 1.6 for the PC

1. Run the TI Connect software. If you do not have USB or Graphlink cable to connect your calculator to your computer then you cannot obtain screen shots.

The first screen you will come to looks like this:

2. Click on TI Screen Capture. TI Connect will grab a copy of what ever is currently on your TI83/84 screen.

👺 TI ScreenCapture - Screen Capture
File Edit View Image Tools Actions Window Help
🎦 🗄 🔓 🗳 📾 📲 🖬 🗾 🛓
🐸 Screen Capture 💷 🗖 🔀

3. You can now copy and paste the image to your word processor, save the file to your computer or print the file as needed.
