Capturing Screenshots

(last updated 12/08)

These instructions are based on TI Connect version 1.6 for the Mac

A very nice feature of the TI Connect software is the ability to capture a screen shot of your TI-83/84. To do so, follow the steps as outlined below.

- 1. Connect your calculator to your computer via a USB cable and run the TI Connect software.
- 2. Select **TI Device Explorer > View Device Screenshot**

0 0	TI Connect X	\Box
- 1	🥝 -	
TI Data Editor	TI Software Update	
_		
	TI Data Editor	
	TI Data editor is used to create and edit matrices, lists, text, programs, strings, groups, numbers and other data types.	Tasks
	TI Device Explorer	
	TI Device Explorer is used to view and manipulate the content of devices, their screens, clocks, and information.	Tasks
	TI OS Postoro	Set Device Clock
	II OS RESIDIE	View Device Information
	TI OS Restore is used to restore the Operating System of attached devices that have no OS present.	Send Files to Devices
	TI Software Update	copy mes to computers
	TI Software Update is used to update the Operating System or the Applications present on your device.	Tasks
Create	▼ View/Edit ▼ Other	•

3. This will open the Explorer. Select the device you are using – a TI-84 in this example.

00		TI Device	Explorer		\bigcirc
₩.	Ŀ	(i)	\mathbf{X}	Q Search	\supset
Screen Capture	Clock Editor	Device Information	Delete	Search	Refresh
Name			A 222	🌹 Туре	Size
🕨 🏓 🖬 TI-84	Plus			TI-84 Plus	403.4

4. Produce the output you want to capture on your calculator.

5. Click on the **Screen Capture** button in the Explorer software. A new window will open with an image of what ever you currently have on your calculator screen – in his case a scatter plot.
